

## The Orthopedic Center of St. Louis

Michael J. Milne, M.D.; Lyndon B. Gross, M.D., PhD;  
John O. Krause, M.D.; Mark D. Miller, M.D.; and Paul S. Lux, M.D.

14825 N. Outer Forty Rd., Suite 200 • Chesterfield, MO 63017 • 314-336-2555 • [www.toc-stl.com](http://www.toc-stl.com)

The Orthopedic Center of St. Louis continues to raise the standard of orthopedic care in St. Louis, providing the highest quality comprehensive care under one roof in a convenient personalized setting. In 2008, TOC added a tenth surgeon and expanded its orthopedic services.

Michael J. Milne, M.D. is board certified and fellowship trained in shoulder and knee surgery. His care philosophy is to treat each patient as a VIP "by providing world-class expertise in a friendly, no-nonsense fashion -- the same way that we would treat our own families." Dr. Milne sees a bright future in orthopedics. "We are making huge strides in minimally invasive surgery and joint preservation," he says. "We are doing more and more to restore function in injured people with less and less downtime." Dr. Milne is also assistant team physician for the St. Louis Cardinals.

Lyndon B. Gross, M.D., Ph.D. is a board-certified orthopedic surgeon who is fellowship trained in sports medicine and specializes in shoulder, elbow and knee surgery. Dr. Gross is the head team physician for the Saint Louis University Billikens and is assistant team physician for the St. Louis Cardinals. Dr. Gross and his staff have truly raised the expectations of orthopedic care by treating his patients with compassion and flexibility in an effort to make the process of returning them to activities as convenient as possible.

John O. Krause, M.D. is a board-certified orthopedic surgeon specializing in

lower extremity (knee, foot and ankle) surgery, sports medicine, and deformity correction. From straightforward ailments such as bunions and arthritic joints, to complex sports injuries or traumatic reconstructions, Dr. Krause evaluates and treats the whole patient to achieve the desired level of patient mobility and activity. "My practice is to combine state of the art techniques with proven traditional treatment modalities to allow the most reliable recovery from orthopedic conditions that limit mobility," says Krause.

Mark D. Miller, M.D. is a board-certified orthopedic surgeon and sports medicine specialist who is fellowship-trained in both sports medicine and shoulder surgery. Dr. Miller is the team physician for select teams such as the St. Louis Scott Gallagher soccer club as well as Parkway West and Parkway South high schools. "There is nothing more satisfying than seeing a patient make a full recovery and start enjoying their life again, without pain," he says.

Paul S. Lux, M.D. is a board-certified fellowship trained orthopedic surgeon who is specializing in minimally invasive hip and knee replacement. He is an internationally known speaker and inventor of the Profemur LX Total Hip System and Evolution Total Knee System.

As The Orthopedic Center of St. Louis continues to grow and add services, it remains committed to combining high technology with personalized care. For all of your orthopedic needs, insist upon the best.
